

NORTHWEST PRECAST

Precast Concrete Decks

Precast Concrete decks offer an easy to install, cost effective, long lasting solution for exterior decks.

Northwest Precast can engineer and produce a Precast deck to meet the requirements or specifications of your project.

- High strength 8,500± psi concrete.
- Reduces Thermal Heat Transfer to building.
- Non-Slip/Waterproofing coating applied at our plant before delivery to the job site.
- Cost effective for High Rise buildings.
- Designed with a slope and drip edge underneath for water management.
- Threaded inserts cast into the precast for railing attachment.
